

# Wood Cover and Steelhead Habitat Density Scalar

Downloaded on: 2026-06-27, From: <https://mjbayly.com/stressor-response/wood-cover-and-steelhead-habitat-density-scalar>  
Function Updated by mbayly on Tue, 12/31/2024 - 21:21.

## Species Information

**Common Name:** Steelhead Trout  
**Genus:** *Oncorhynchus mykiss*

## Stressor Details

**Stressor Name:** Wood Cover  
**Units:** Wood Complexity Rating  
**Metric:** Wood Cover  
**Scale:** linear  
**Function Type:** continuous  
**Vital Rate/Process:** Density

## Life Stage & Context

**Life Stages:** Parr

## Descriptions

### Overview

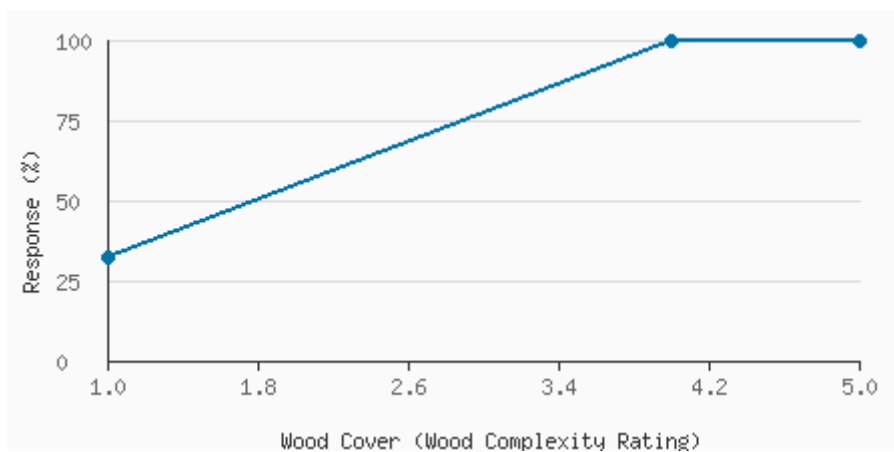

Figure 2. Habitat preference relationships applied within the UCM for scaling standard parr densities to those expected under the specific habitat features in a given stream.

Scaled from the original curve so that the highest upper limit value equals to 100%.

### Function Derivation

expert opinion

## Stressor Response Data

Stressor (X)	Mean System Capacity (%)	SD	low.limit	up.limit
1	32.06521739	0	0	100
4	100	0	0	100
5	100	0	0	100
