

# Generic Substrate and Sockeye Salmon

Downloaded on: 2026-05-23, From: <https://mjbayly.com/stressor-response/generic-substrate-and-sockeye-salmon>  
Function Updated by mbakken on Mon, 02/24/2025 - 17:48.

## Species Information

**Common Name:** Sockeye Salmon

**Latin Name:** nerka

**Genus:** Oncorhynchus

## Stressor Details

**Stressor Name:** Substrate

**Units:** (see notes)

**Metric:** Substrate Class Categorical

**Scale:** linear

**Function Type:** step

**Vital Rate/Process:** HSI

## Life Stage & Context

**Life Stages:** Spawners

**Geography:** Washington

**Activity:** Spawning

## Descriptions

### Overview

WDFW and Ecology recommended Habitat Suitability Criteria (HSC) or preference codes and values for instream flow modeling using PHABSIM or RHABSIM models. These values are based on habitat suitability studies. WDFW and/or Ecology staff (or individuals following WDFW-Ecology study guidelines) recorded the depth, velocity, substrate, and cover used by fish in a study reach.

Recommended Preferences do not always accurately reflect local conditions. Therefore, these preference values should only be used after consultation with and written agreement of WDFW and/or Ecology instream flow biologists. HSI preference curves are being revised continually as new data are obtained and analyzed. Please contact the Department of Ecology or WDFW for the most recent preference curves for salmon, trout, and other game fishes.

#### Cover Classes

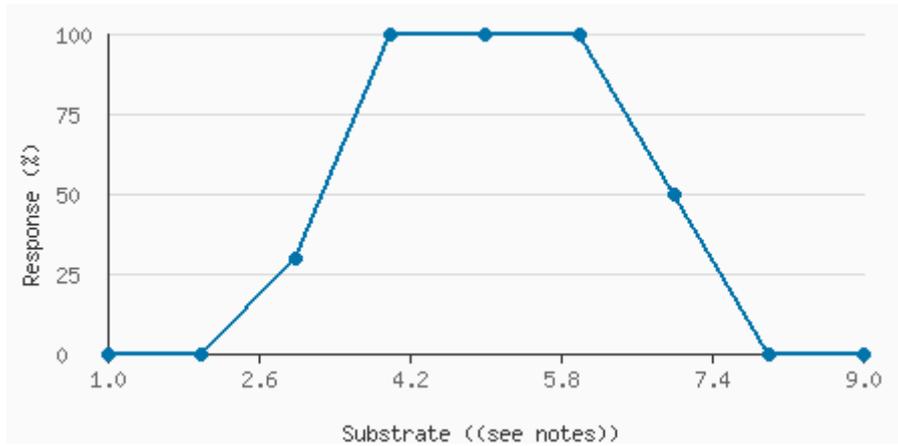

- 1 - silt, clay, or organic
- 2 - sand
- 3 - sm gravel (0.1-.5")
- 4 - med gravel (.5-1.5")
- 5 - lrg gravel (1.5-3")
- 6 - sm cobble (3-6")
- 7 - lrg cobble (6-12")
- 8 - boulder (>12")
- 9 - bedrock

TABLE 12. Pink Salmon (*O. gorbuscha*) Spawning Substrate Preference Data

Squire Creek, N. Fork Stillaguamish, Dosewallips, and Duckabush rivers (3 studies, 46 redds).

For the full table of 3 digit codes, use Table 2

## Stressor Response Data

Raw Stressor Values	Scaled Response Values 0 to 100	SD	low.limit	up.limit
1	0	0	0	100
2	0	0	0	100
3	30	0	0	100
4	100	0	0	100
5	100	0	0	100
6	100	0	0	100
7	50	0	0	100
8	0	0	0	100
9	0	0	0	100
